

We Keep It Alive

It's smooth and special
Starts with R&B
Mixed with soul and jazz so sweet
Wrap it in a rhythm
Man it swings
One listen you gotta shake that thing

They don't make many songs like that today
If we're not careful it might just fade away

We keep it alive
Can't let the music die
It's soul for our soul
We grab the groove and don't let go

We keep it alive
Hold on tight
If that funky music's gone
I don't think that we could carry on

We hear that music
When we're feeling fine
It's always been a part of good times
With me and my woman
It feels so good
Always puts us in the perfect mood

Nowadays most people don't wanna dance
But we still got to play it any chance we can

Chorus

We can try a different style
And that might do for a little while
But in the end we miss that beat
We need that feel to be complete

Chorus
